

## Surgery Planning and Procedures

What type of information do we discuss when surgery planning?					
Will you need factor? How much?	Will you need additional prescriptions?	Will you need a central line?	Who is your surgeon? Have we talked to them?	Do you have a support person?	What/when were your last labs?

The main reason we want to see you before each procedure, is to make sure we are setting you up for a safe and quick recovery. Any time that you have a planned procedure or surgery coming up, make sure to include us at the HTC. If we haven't seen you in a few months, we will set up a time to have you come in and give us any updates and allow us to do a physical assessment. We will then discuss what your plan will look like. Sometimes we also need to reach out the surgeon or other doctor to learn more about the bleeding risks and process, so your plan will be communicated after you see the doctor.

**If you would like more information or want to speak with your HTC Team about Wednesday Wellness, please contact Diane or Alicia at (208) 381-2782.**
